PROFILE

Technical implementation professional with hands-on responsibility for requirements gathering, analysis and management, and coordinating client-specific platform changes through production Go-Live. Translates business needs into technical requirements, evaluates configuration options and change requests, and coordinates testing, release documentation and issue resolution across client, management and engineering teams. Experienced with internally developed PaaS workflow platforms, project tracking and continuous process improvement.

PROFESSIONAL EXPERIENCE

Technical Implementation Consultant | Passcon GmbH (AML RightSource) **07/2025 – 02/2026**

Frankfurt am Main, Germany

- Owned requirements gathering, analysis and documentation for client-specific platform implementations, translating business needs into technical requirements and maintaining master requirements documents in Confluence.
- Clarified conflicting requirements across client management and operational users through follow-up discussions, documented comparisons and coordinated solution proposals with technical teams.
- Assessed incoming change requests for category, technical feasibility, estimated effort and potential impact; prepared recommendations and escalated significant changes for management approval.
- Evaluated platform features and configuration options against client requirements, scope and budget, recommending workable solutions within the company's internally developed PaaS workflow ecosystem.
- Configured platform roles, permissions, content, workflows and environments; coordinated software releases, configuration changes, customer-specific deployments and workflow updates across six projects (four in post-production and two in implementation).
- Prepared release notes with a Technical Team business analyst, drafted and refined implementation plans and status communications, and tracked tasks, dependencies, risks and open issues with project stakeholders.
- Wrote manual test steps, distributed testing tasks and personally tested requested features; maintained test scenarios and readiness checklists, coordinated defect resolution and supported Go-Live and post-production follow-up.
- Created reusable templates, checklists, documentation and workflow improvements to make requirements and implementation activities more consistent and manageable.

Client Operations Coordinator | Passcon GmbH (AML RightSource) **07/2024 – 07/2025**

Frankfurt am Main, Germany

- Coordinated day-to-day work for an eight-person team, distributed tasks and aligned operational priorities across stakeholders.
- Coordinated activities and documentation across more than 15 projects, supporting client onboarding, delivery tracking, reporting tools and KPI maintenance.
- Worked with specialists and managers to structure project workflows, follow up on improvement opportunities and support internal standardisation.
- Contributed to forecasting, invoicing and business-development activities while maintaining service quality and delivery discipline.

IT Consultant | Passcon GmbH (AML RightSource) **01/2022 – 07/2024**

Frankfurt am Main, Germany

- Analysed transactions, performed KYC reviews and documented findings in line with AML/KYC procedures and quality requirements.
- Produced structured written assessments, incorporated quality-control feedback and supported colleagues through knowledge sharing and training.
- Developed more than 250 Power BI dashboards for forecasting, budget-versus-actual reporting and KPI monitoring; accelerated variance analysis by more than 90% through improved reporting workflows.

Technical Consultant | SBES Technologies UG **10/2021 – 12/2021**

Cologne, Germany

- Analysed technical requirements and supported customers in implementing suitable solutions.

CAE Analyst | Numericx Engineering Services Pvt. Ltd. **03/2020 – 02/2021**

Engineering Trainee | Neva Impex Pvt. Ltd. **05/2013 – 09/2014**

RELEVANT SKILLS

Requirements and change management: Requirements gathering and analysis, requirements documentation, stakeholder clarification, master requirements documents, change-request assessment, feasibility and effort estimation, solution proposals

Release and delivery coordination: Release notes, implementation planning, manual testing, test scenarios, readiness checklists, defect follow-up, Go-Live coordination, post-production support, dependency and status tracking

Platforms and process improvement: Internally developed PaaS workflow platforms, role and permission administration, content and workflow configuration, environment configuration, reusable templates, process documentation and standardisation

Tools: Jira, Jira Service Management (Jira Service Desk), Confluence, MS Project, Excel, Visio, Microsoft To Do, Power Automate

Technical and data skills: SQL, Python, ETL/ELT, databases, data modelling, Power BI, DAX, Power Query, reporting automation, data quality

Domain experience: Client-facing technology implementation, financial services, AML/KYC and compliance workflows

EDUCATION

M.Sc. Computational Mechanics | University of Duisburg-Essen, Germany **01/2021**

B.Tech. Mechanical Engineering | JNTU Kakinada, India **05/2013**

LANGUAGES AND ADDITIONAL INFORMATION

German: C1 | **English:** C1

German permanent residence with authorisation to work in Germany; open to relocation within Germany; available for occasional business travel.
